

## Epidemics: The Story of South Africa s Five Most Lethal Human Diseases (Paperback)

By Howard Phillips

Ohio University Press, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book. This is the first history of epidemics in South Africa, lethal episodes that significantly shaped this society over three centuries. Focusing on five devastating diseases between 1713 and today-smallpox, bubonic plague, u201cSpanish influenza, u201d polio, and HIV/AIDS-the book probes their origins, their catastrophic courses, and their consequences in both the short and long terms. The impacts of these epidemics ranged from the demographic-the u201cSpanish flu, u201d for instance, claimed the lives of 6 percent of the country s population in six weeks-to the political, the social, the economic, the spiritual, the psychological, and the cultural. Moreover, as each of these epidemics occurred at crucial moments in the country s history-such as during the South African War and World War I-the book also examines how these processes affected and were affected by the five epidemics. To those who read this book, history will not look the same again.

### Reviews

*This publication may be really worth a go through, and a lot better than other. It really is writter in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Natalie Abbott**

*This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.*
