

Toward Better Usability, Security, and Privacy of Information Technology: Report of a Workshop

By Steering Committee on the Usability, Security, and Privacy of Computer Systems, Computer Science and Telecommunications Board, Division on Engineering and Physical Sciences, National Research Council

National Academies Press. Paperback. Book Condition: new. BRAND NEW, Toward Better Usability, Security, and Privacy of Information Technology: Report of a Workshop, Steering Committee on the Usability, Security, and Privacy of Computer Systems, Computer Science and Telecommunications Board, Division on Engineering and Physical Sciences, National Research Council, Despite many advances, security and privacy often remain too complex for individuals or enterprises to manage effectively or to use conveniently. Security is hard for users, administrators, and developers to understand, making it all too easy to use, configure, or operate systems in ways that are inadvertently insecure. Moreover, security and privacy technologies originally were developed in a context in which system administrators had primary responsibility for security and privacy protections and in which the users tended to be sophisticated. Today, the user base is much wider--including the vast majority of employees in many organizations and a large fraction of households--but the basic models for security and privacy are essentially unchanged. Security features can be clumsy and awkward to use and can present significant obstacles to getting work done. As a result, cybersecurity measures are all too often disabled or bypassed by the users they are intended to protect. Similarly, when security gets...

Reviews

Complete guide for publication enthusiasts. I have read and i am sure that i will going to study again once again in the future. Your way of life period will be transform once you total looking over this publication.
