

Star Tek Perspectives on Terrestrial Technology

By Celestial Blue Star, David Of Arcturus, Ningishzida

Createspace, United States, 2011. Paperback. Book Condition: New. 226 x 150 mm. Language: English . Brand New Book ***** Print on Demand *****.This is a frank discussion on terrestrial technology and free form energy. In this first volume we discuss how to build certain devices using free form energy and why this energy is so important to the planet. We provide information on building Earth Batteries, the Transfiguration Accelerator and other tools anyone can build and use for dowsing, etc. Our goal is to re-educate people about what they once knew but have forgotten about. In this manner we can all provide vital, healthy ways to assist the environment and ourselves as well. Our purpose in writing this book, this is volume 1 of a 2 volume set, is to open the eyes and ears of the public in regard to understanding and using better more advanced ways to have and share an ancient technology that is noninvasive. The sooner that people arrive at the apex of understanding why they have not known about this type of highly charged energy before, the more prone they will be to further investigate, research and put into practice the unlimited ability of this...
