Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from *International Language and Science: Considerations on the Introduction of an International Language Into Science* The scientific attitude of mind is necessarily critical, but never sceptical without proper investigation and know ledge. The Translator hopes, therefore, that English speaking men of science will not judge the question of international language before they have quietly and dis passionately examined the arguments so ably set forth in the following pages. It is not a question of another language; it is a question of the final solution by the methods of science of one of the greatest of scientific problems. Internationalisation of thought is the motto of the twentieth century, the device on the banner of progress. Science, the super-nation of the world, must lead the way in this as in all other things. Amidst the clangour and the clamour of political and commercial strife, the quiet empire of knowledge grows, noiseless and unseen. Let all those who believe that this peaceful empire is destined to become the controlling force of the world assist in the attunement of its common language. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
